EMCOR Services Betlem

704 Clinton Ave. South
Rochester, NY 14620-1402

585.271.5500 **Toll Free:** 800.423.8536 emcorbetlem.com

Offices in: Rochester | Jamestown | Buffalo | Syracuse

From fabrication and installation to repair and retrofit, we provide a comprehensive range of process piping services. Our team has the hands-on experience and specialized knowledge needed to handle the complex piping systems and components involved in a variety of industrial processes.

Comprehensive Capabilities

We have the capacity to function as a single source for industrial process piping solutions, from system layout through testing and maintenance.

Beyond standard installation, erection, and rigging solutions, **we also offer a variety of additional services, such as:**

- > Equipment setting
- > Support fabrication
- > Steam heat tracing
- > Jacketed pipe
- > Tank installations
- > Plant maintenance
- > Vacuum piping
- > Orbital welding

Certified, Skilled, Experienced

We employ a highly experienced team of welders and pipefitters, backed by a full-service pipe fabrication shop.

Our craftsmen are trained and certified in the following:

- > Metal inert gas (MIG) and tungsten inert gas (TIG) welding
- > Stick welding
- > Orbital welding
- > Threading
- > Plastic fusion
- > Soldering
- > Mechanical joints
- > Tri-clover and flanged fittings
